

1. Peer Feedback:

- a. One thing that had some criticism was the functionality of the site. Some users suggested more usability for the user. There was one complaint about the font color.

2. Site Walk-Through

- a. Date: This happened in person on May 5th.
- b. My client agreed that users are getting all of the information they need from the site. She listed out operating hours, pricing, and services as the big three things she wants them to know about.
- c. My client is happy with the aesthetics of the site.
- d. A common theme in the feedback was usability. My client agreed, saying that the ordering page needed a bit of work.
- e. Important issues my client identified:
 - i. Font Color: My client agreed that the font could be hard to read at times. (High). **Implementation:** Add a subtle text shadow that makes it easier to read.
 - ii. Ordering Page: My client also agreed that the ordering page needed a bit of work. (Medium). **Implementation:** Update the date picker to say which days are not available (i.e, we are closed), and show time slots.
- f. No other feedback was given.
- g. Final tweaks to be made:
 - i. **Font Color**
 - ii. **Ordering Page tweaks**
 - iii. **Performance Improvements (DECISION MADE BY ME!)**
