

C. Reflection

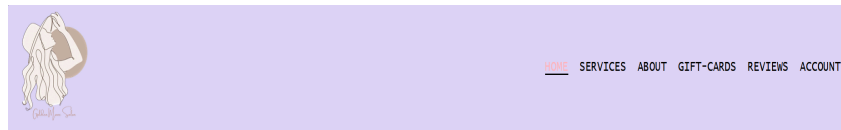

1. Based on feedback, there really wasn't too much to change. However, I did change the about page, and how navigation links work.

a. Navigation links before all had the same color at the top of the site. By changing it, it allows the user to more easily tell what page they are currently on.

i.

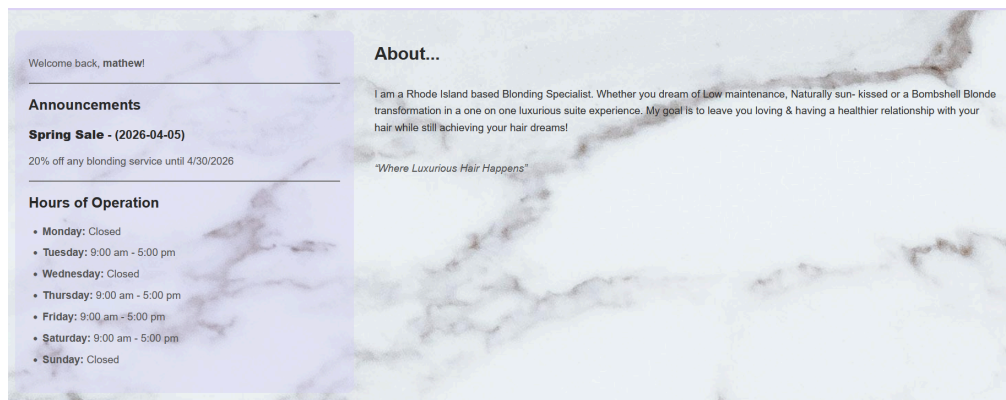

ii.

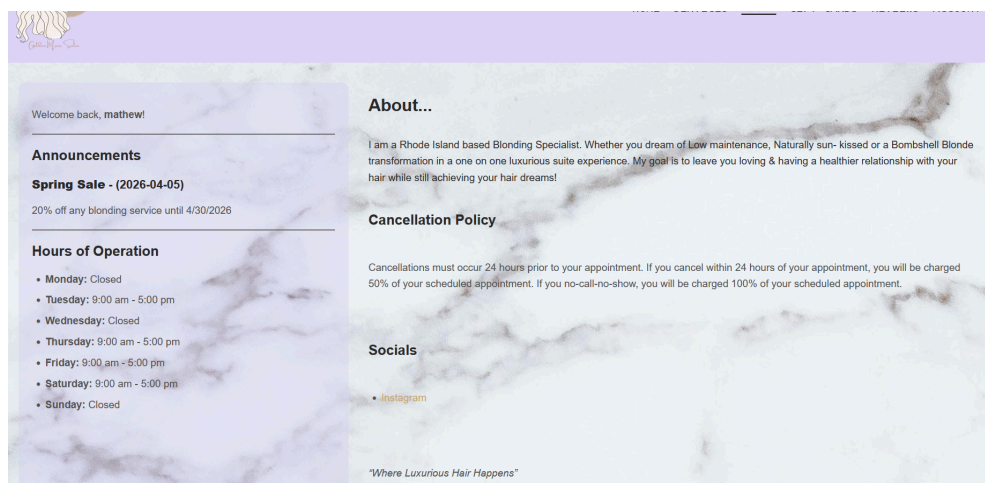

b. The about page got spruced up to include some more key details my client wanted.

i.

ii.

2. The feedback more easily allowed users to identify the page they were on in case they got lost. In addition, it also brought some pretty big changes to the about section that gave more critical information for people to decide if they wanted to work with my client or not. It also gave them a way to look at more of her work via her instagram.

3. My client only had 2 suggestions, so I implemented them both.

4. Features

- a. I spoke to my client about more features that she'd like added. There isn't much left to add, as it was mostly just:
 - i. More booking functionality
 - ii. Ability to hold cards on file until the appointment was completed
 - iii. Ability to charge those cards if they did a cancellation or no-show.
- b. I'm not sure if I'll be able to actually add these features based off of what we're learning, but at least placeholder stuff should suffice.
